PROFESSIONAL SUMMARY

Aspiring AI and Full-Stack Developer with hands-on experience in React.js, Node.js, Express.js, MySQL, and MongoDB. Strong foundation in building secure full-stack applications using REST APIs and JWT authentication. Completed industry-aligned data visualization simulations and seeking an internship to apply software development and AI/ML skills in real-world environments.

EDUCATION

Bachelor of Technology in Artificial Intelligence	2023 – 2027
G. Pullaiah College of Engineering and Technology, Kurnool, India	
Intermediate (Class XII)	Completed April 2023
KVR College for Girls, Kurnool, India	
Secondary School Certificate (Class X)	Completed April 2020
Indira Gandhi Memorial High School, Kurnool, India	

TECHNICAL SKILLS

Programming Languages	Java, Python
Frontend Technologies	React.js, HTML, CSS
Backend Technologies	Node.js, Express.js
Databases	MySQL, MongoDB
APIs and Authentication	REST APIs, JWT Authentication
AI / ML	Machine Learning Fundamentals

INTERNSHIP EXPERIENCE

AI/ML Intern – Rejolt Edtech Private Limited 2026

Project: Anomaly Detection in Network Activities Using Generative AI-Enhanced Hybrid Deep Learning

- Developed an intelligent anomaly detection system to identify malicious and abnormal network activities from network traffic data.
- Performed data preprocessing, feature engineering, and exploratory analysis on network datasets to improve model performance.
- Implemented hybrid deep learning models for classifying network traffic as normal or anomalous.
- Applied Generative AI concepts to enhance threat analysis and support intelligent decision-making for cybersecurity monitoring.
- Built REST APIs using FastAPI to serve real-time anomaly detection predictions.
- Integrated real-time monitoring and alert generation mechanisms for network security events.
- Evaluated model performance using classification metrics and optimized detection accuracy.

PROJECTS

Anomaly Detection in Network Activities Using Generative AI–Enhanced Hybrid Deep Learning *Python, FastAPI, Deep Learning, Generative AI*

- Developed a hybrid deep learning system for detecting anomalous network activities and potential cyber threats.
- Performed data preprocessing, feature engineering, and model evaluation on network traffic datasets.
- Built FastAPI-based APIs for real-time prediction and monitoring.
- Integrated threat scoring, alert generation, and attack classification modules for intelligent security analysis.

MindHaven AI – Mental Wellness AI Assistant *Python, FastAPI, Streamlit, LangChain, Ollama, MedGemma 4B*

- Developed an AI-powered mental wellness assistant using locally hosted Large Language Models.
- Built RESTful APIs with FastAPI and an interactive chat interface using Streamlit.
- Integrated LangChain and Ollama to provide context-aware and privacy-focused AI interactions.
- Designed a modular architecture for scalable AI agent workflows.

MERN Real-Time Chat Application *MongoDB, Express.js, React.js, Node.js, Socket.IO*

- Developed a real-time messaging application with user authentication using JWT.
- Implemented one-to-one chat, image sharing, message editing, and deletion features.
- Integrated Socket.IO for instant message delivery and real-time updates.
- Managed user data and chat history using MongoDB.

CERTIFICATIONS AND SIMULATIONS

Tata Data Visualization: Empowering Business with Effective Insights (Job Simulation) *Forage, August 2025*

- Created business-focused data visualizations for Tata Consultancy Services.
- Prepared analytical questions for meetings with client senior leadership.
- Delivered executive-level insights to support effective decision-making.

ACHIEVEMENTS

- Qualified TCS CodeVita Round 2 with a global rank of 569.
